so I want for that notification that is showing at the start of the application I wanted to be just there for just like 5 seconds and not 10 seconds just 5 seconds with the ability for the user to just click it and turn it right or not turn his finger right or wrong and it's vanishes that's a notification vanishes okay because he removed it okay also I want this for main page to have the entire like aspects it shows the the photo and the buttons underneath it you know the choose from the gallery and continue without a photo I want them all to be someone in the image without him having to scroll down or up okay and all languages Arabic French in English

#2

07/11/2026, 22:09:09 · customer · en · light · customer · saw

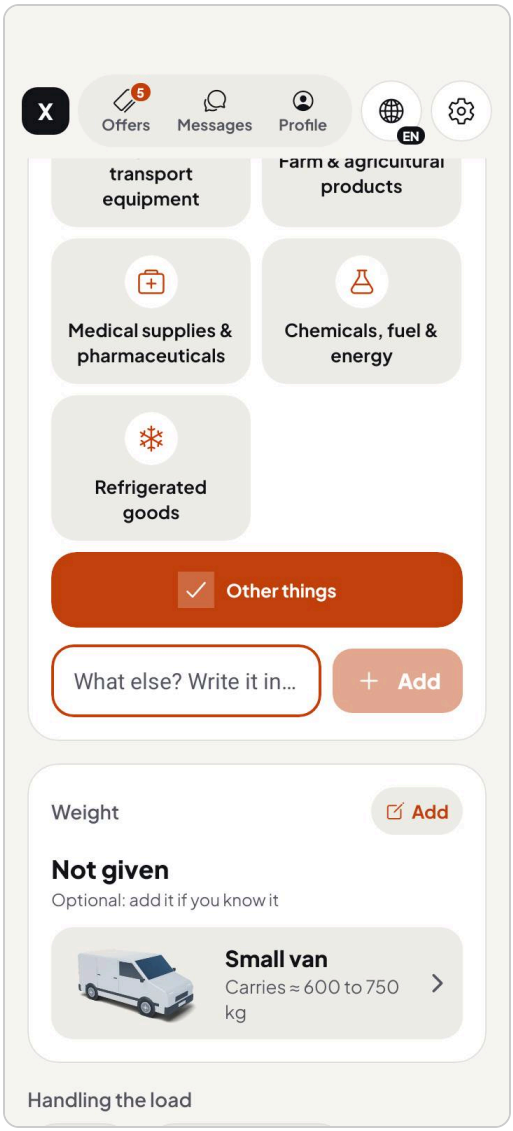

and this screen you can see that's under what are you moving there are options but those options are put in the regularly really large really large buttons please minimize them make them like minimum liquids can be seen as without taking a whole Space of the page okay

#3

07/11/2026, 22:10:52 · customer · en · light · customer · saw

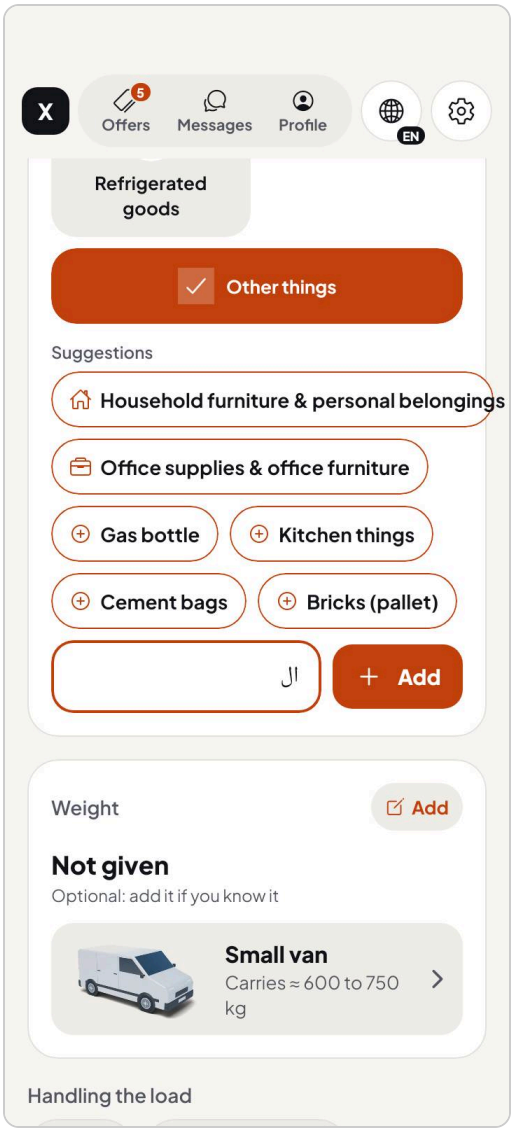

okay so make it that he chooses one of those options about what to pick make it that if he chooses one of them or any one or many of them that they get highlighted if the if he and the other ones vanish if he choose other things because now with other things if he chooses one of those options then other things now he writes some things which will be added to those things that he chooses before and if he doesn't change any of those things those options as we give him at the beginning and he only chooses other things then all that chosen ones before all those choices gets vanish as well and only leave him with other things so that he can write those other things that he will want to like pick up and send okay

#4

07/11/2026, 22:12:07 · customer · en · light · customer · saw

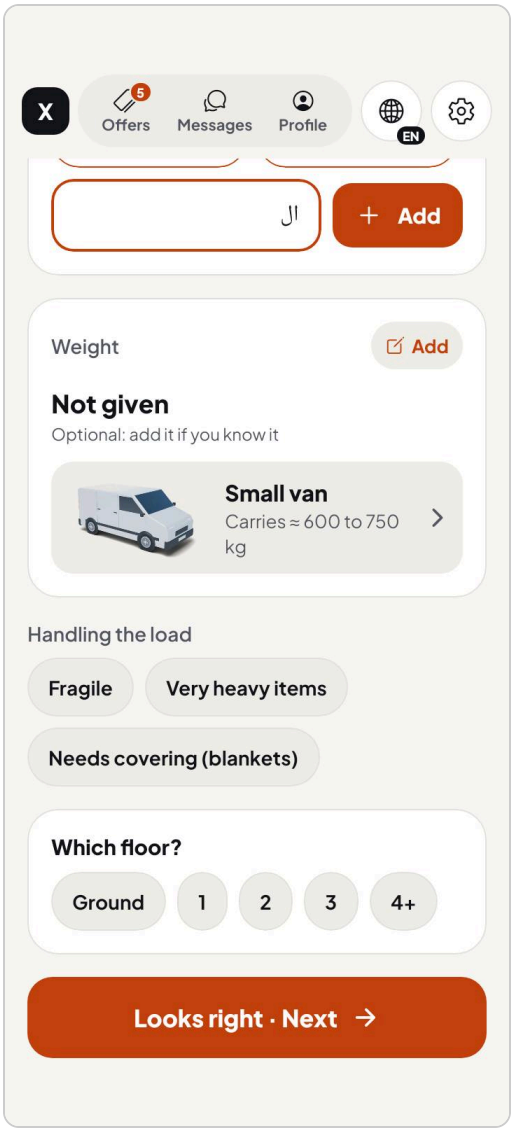

for this box when he start writing the suggestions notice that he gets like the the page shake like it goes up and down it shakes his does it doesn't stay steady I want you to stay steady so that he can get existence that he can just see normally like the box shows up above the keyboard and he gets the six systems normally without them like coming and going like shaking the whole page okay

#5

07/11/2026, 22:14:54 · customer · en · light · customer · saw

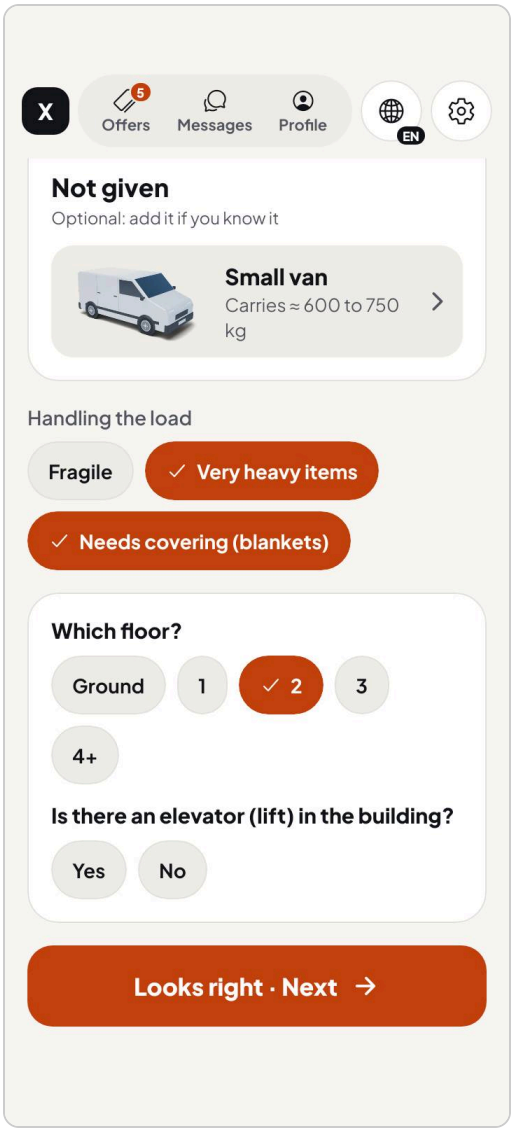

and some scenarios might the customer does not care about the type of the vehicle okay so let's say someone wants to load and pick up motorcycle and send it to another city it doesn't care about the the type of the vehicle which will pick and deliver it it can be a pickup it can be a Transit it can be a big vehicle truck as long as he gets a cheaper price the cheaper price so we shouldn't force him to pick up a vehicle so what do you think should we do in this case should they give him a choice to not pick shall like give us the gift of the application to choice or he can click something that says that I don't care about any type of vehicle or share I don't know just think what you should do here

#6

07/11/2026, 22:15:45 · customer · en · light · customer · saw

make it that he that he can like there is this animated Choice like he can just pick like from Minister plus and he can pick like sometimes it can be like a chin floor or the 20th floor just please just make it that he can pick you know as I said Eminem plus or minus and the number

#7

07/11/2026, 22:18:23 · customer · en · light · customer · saw

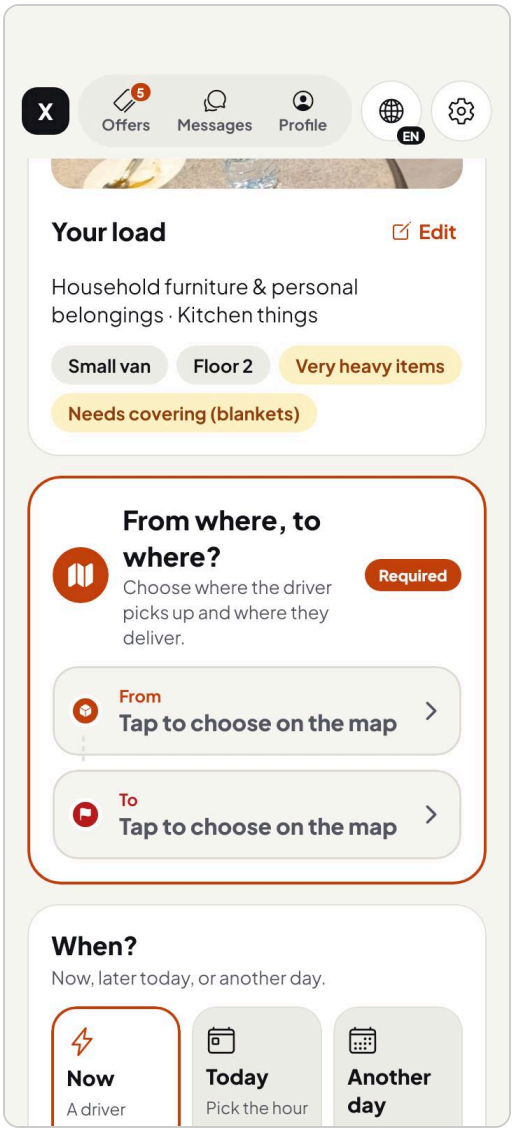

for this options that a customer can pick about his load or cargo please Analyze This options that I that I added and see a do a deep search online search analysis them deeply brainstorm to see if the outfits or that you should replace them or put them in categories to minimize this the oldest options and put the right ones based on the market what people really feel like a move across the country and Morocco or so

#8

07/11/2026, 22:20:33 · customer · en · light · customer · card

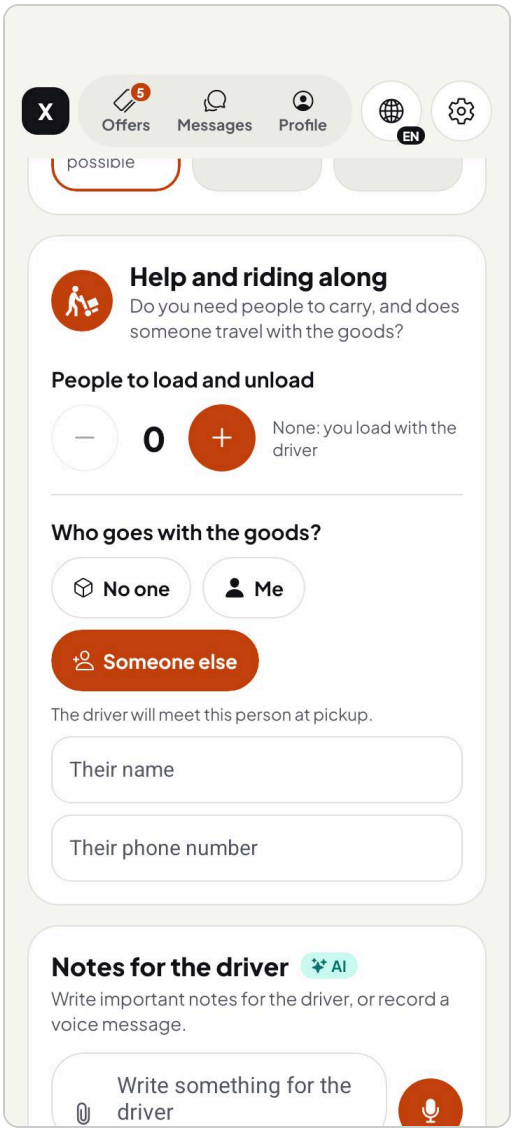

this section from where to where in which the person feels in from where is the pickup and where is the destination I want you to be moved to the previous page under what are you moving okay so either it goes under what's moving once it's in there what's it's it's like a first like a known by the AI or under what it was the options that he makes to what about the goods what are the goods the options that he makes or writes about the goods I wanted to go underneath it this pick up and destination so move it

#9

07/11/2026, 22:21:31 · customer · en · light · customer · card

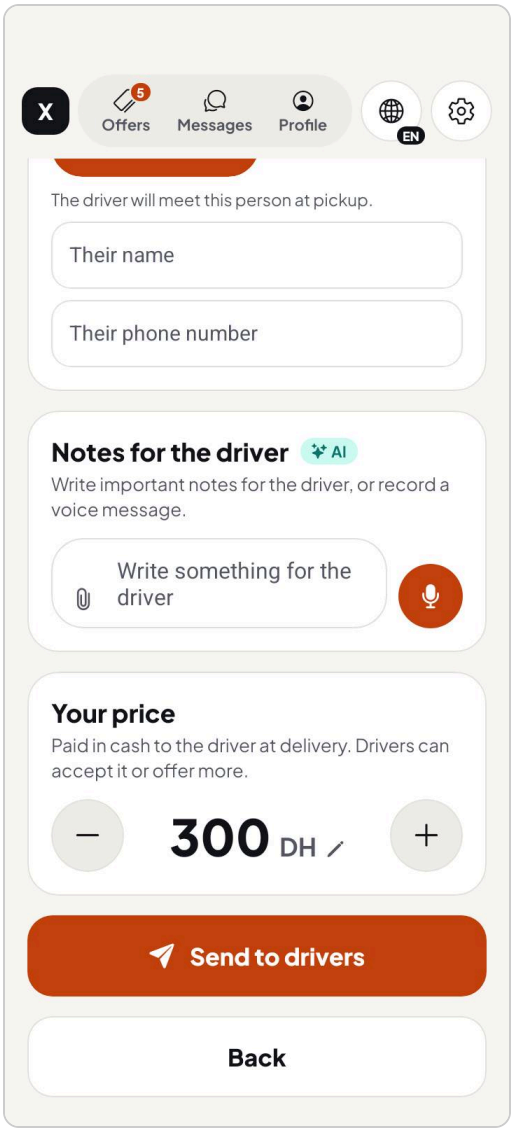

and here for for who goes with the goods if we collect someone else just remove that the name box and the number just remove it just he can just highlight someone else and that's it without giving information or data so remove that

#10

07/11/2026, 22:22:20 · customer · en · light · customer · card

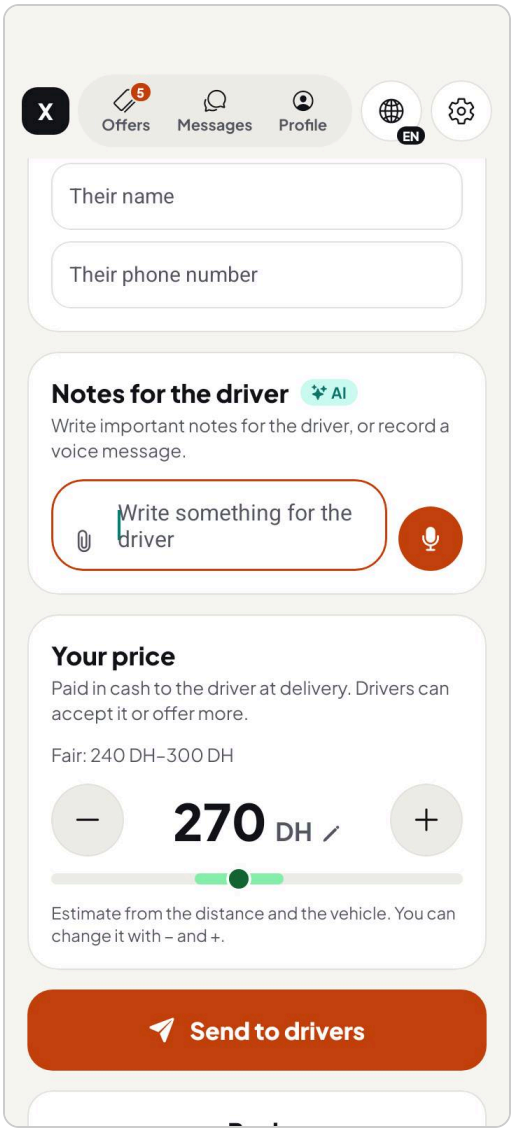

for the price section please build an engine or something that's really gets estimation of the real prices of this voyages based on this destination based on what is known based on the fuel prices based on costs that the driver take this interface and shared service on what is you know if it's you know what's what's no one so you have to put a limit to the price the customer cannot just go down down a limit

#11

07/11/2026, 22:26:01 · customer · en · light · customer · card

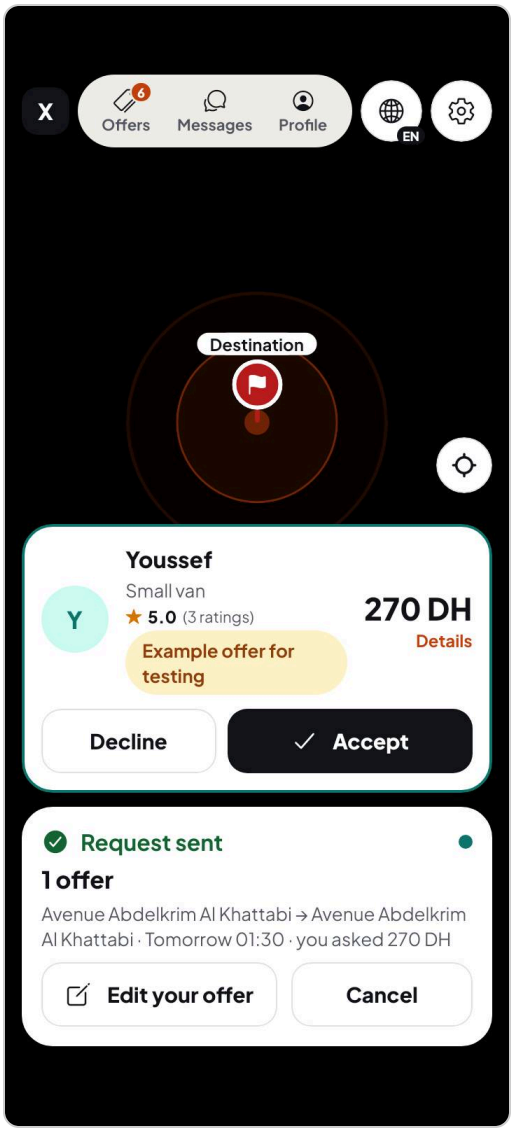

in this screen you can see that the box that in which I should write notes for the driver it has that type in start for in the left while I'm using the Arabic keyboard as you can see in the screen this should not happen that box should end it should be able to recognize the fact that I'm using another big keyboard and goes to the left so I start to go to the right I mean go to the right so that I can start writing from the right unless I chew I change the single language to English or French then it must recognize the fact that I'm using a keyboard French or English and start from the left okay

#12

07/11/2026, 22:26:42 · customer · en · light · customer · trip:open

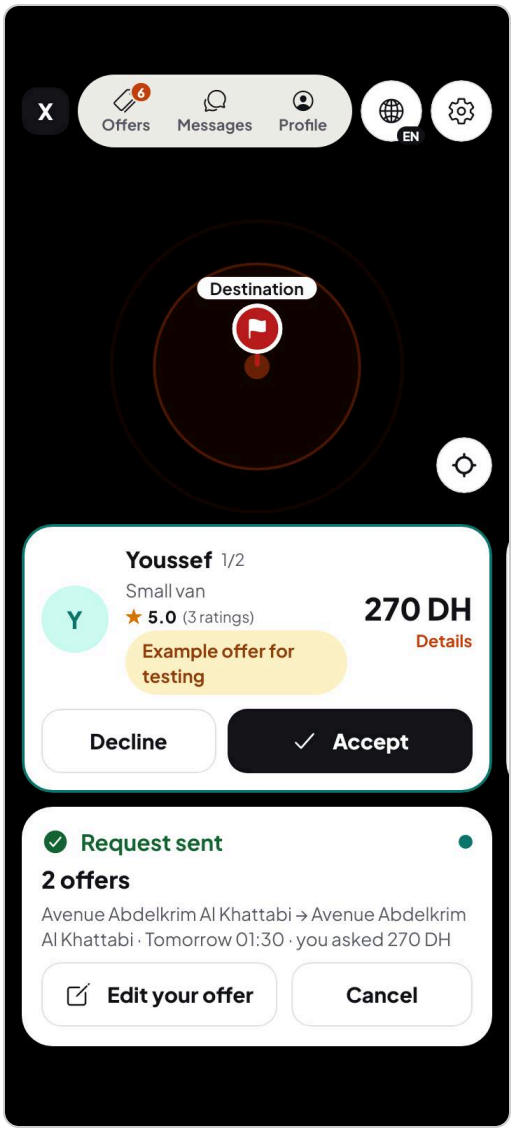

if you can see now it does not show the pickup it's just so the destination I wanted to chill in the map the pickup and the destination and the distance between them and wanted to show it and the real map real map not just a picture of a map real interactive map

#13

07/11/2026, 22:27:36 · customer · en · light · customer · trip:open

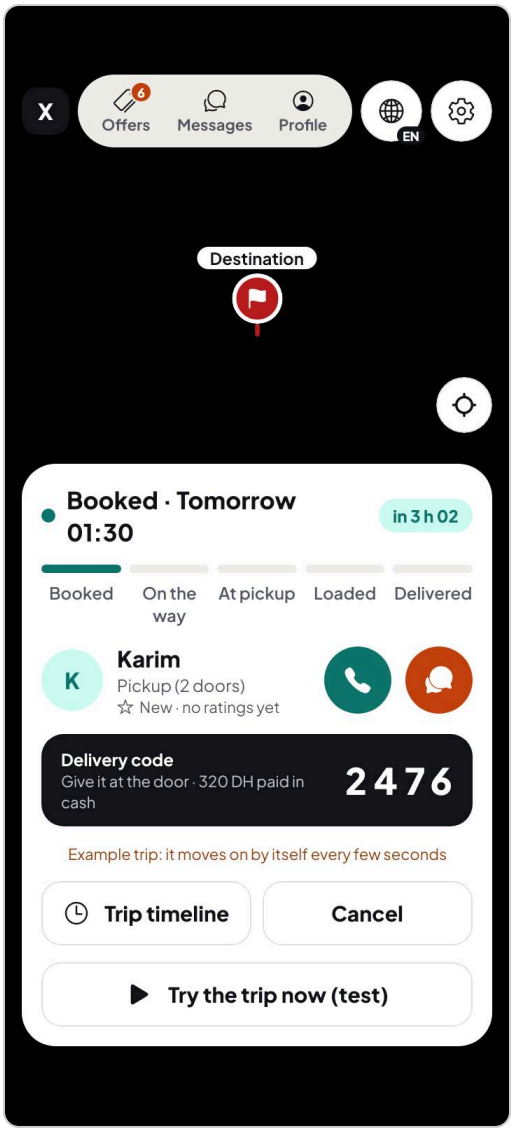

I want the offers to be showing to me one by one one above the other not one besides the other one above the other you know the same design of each of just one above the other okay show them to me one above the other

#14

07/11/2026, 22:30:02 · customer · en · light · customer · trip:accepted

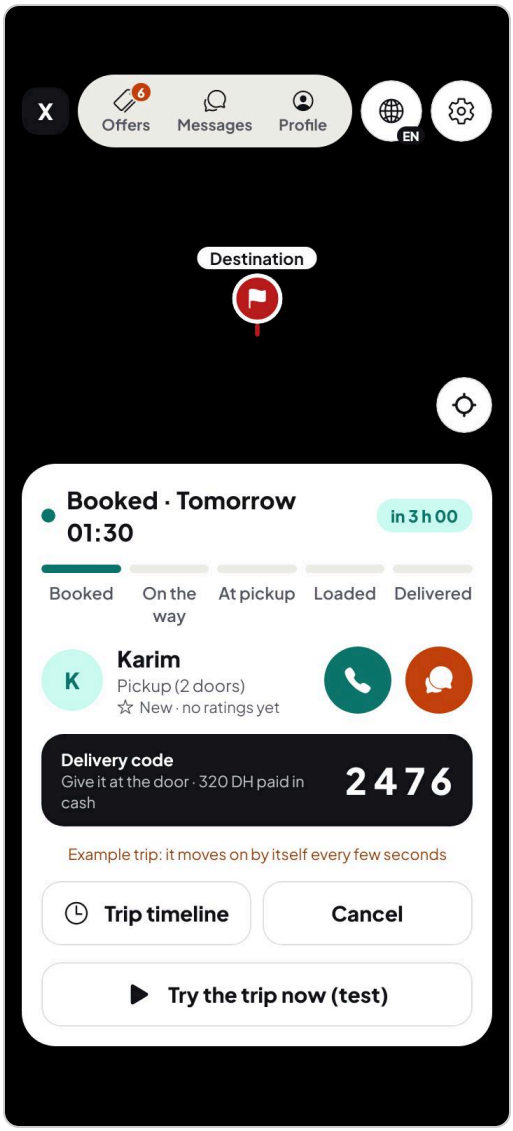

I want you if the offer like the trip I mean is after like an hours or another day I ordered the sale of like at the this time like right now I want you to give me like this notification message that I can see in the in the front and the page I mean in this page that indicates data is about that like it gives me that as explained something to me think it's professional and simple so that I can understand what happened and what will happen

#15

07/11/2026, 22:30:55 · customer · en · light · customer · trip:accepted

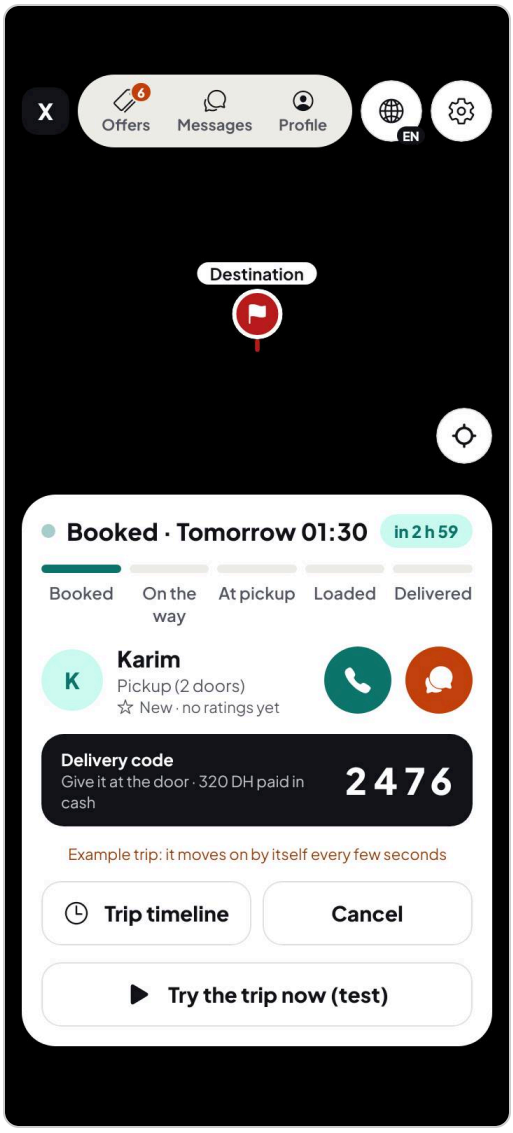

also I want you to indicate what should be done with that code did you know that delivery code you know which you should tell what should be done with that code that you are what should be explained it in that you know that that's a dark text of under the delivery code explain what should be done with it so that it can be understood what should be

#16

07/11/2026, 22:32:23 · customer · en · light · customer · trip:accepted

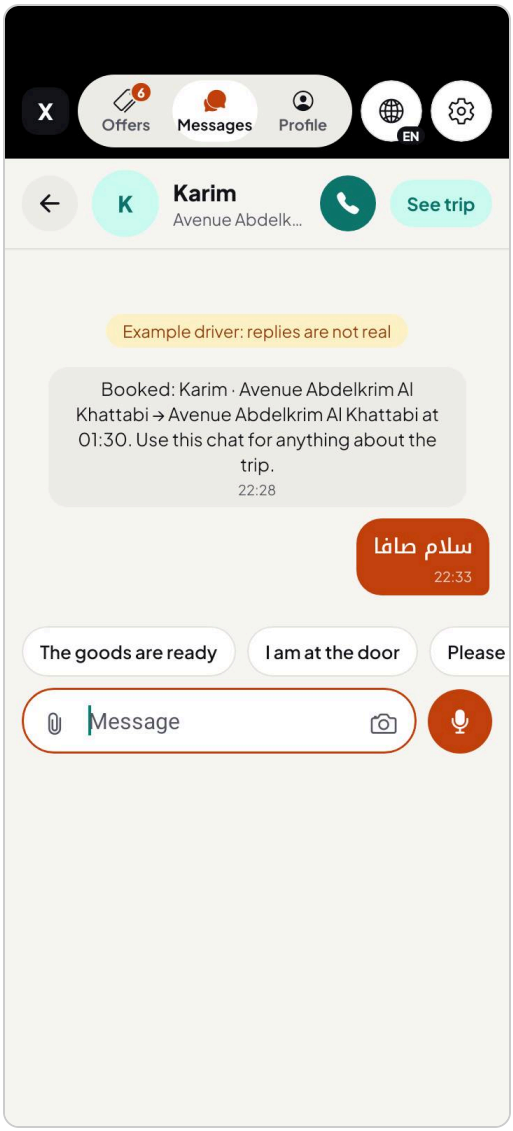

also some way somehow in the app I wanted to have this get help or so something like this button clear and clearly obvious so that people can click it and get your help whether it's the driver or the customer to call they have to either you can call in and the application or they can go have our numbers directly the number of the application for help and we can call and get help maybe regarding the code maybe regarding the destination maybe regarding an issue they have anything and they can get a direct line in which we can call them answer them in help them

#17

07/11/2026, 22:33:34 · customer · en · light · customer · trip:accepted › tab:messages › chat

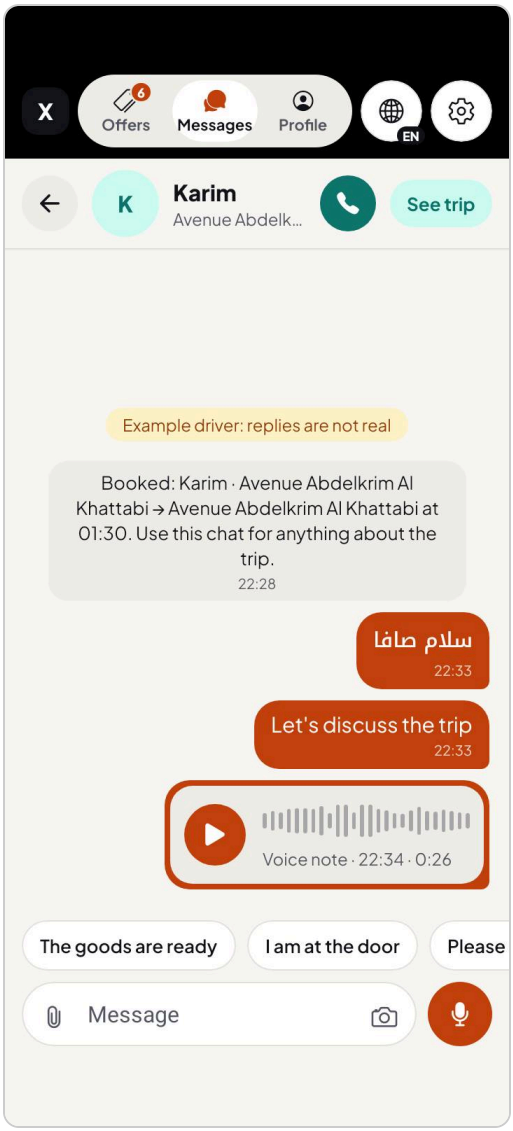

again look at this here is in the text box I'm using the Arabic keyboard although I'm using in the English language in terms of the application but I'm using another big keyboard he must add that box the chatting box must recognize that I'm using the Arabic keyboard and must turn that type of that starts of typing into the right side it must recognize it so it follows it the keyboard

#18

07/11/2026, 22:41:06 · customer · en · light · customer · trip:accepted › tab:messages › chat

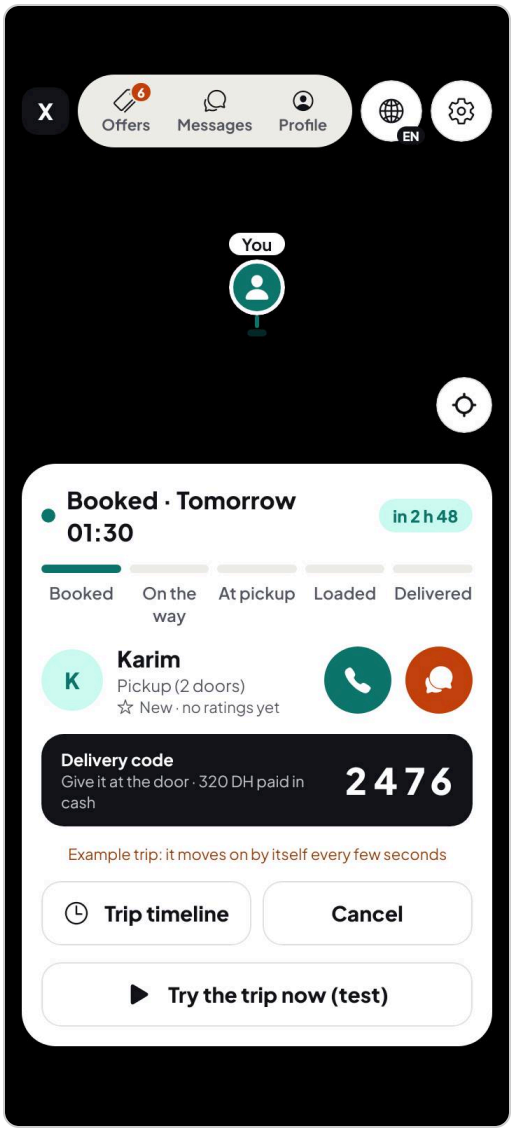

and discharge box I wanted that automatically the customer gets the message and automatic message from the driver that he can see that indicates that he is like something just to figure out what you should do like a brainstorm what should that message should be like what it would never notification it should be in that message as if he's sending them a message like he is coming like in and do what time like this many minutes or so in a who will be there that suggests was already happening in the map or if it's another day he will say that he's committed to come and do this day this day and hour and so and once it's like near that hour the day it goes another notification message and so on and so on like a brainstorm and figure out the best

#19

07/11/2026, 22:43:16 · customer · en · light · customer · trip:accepted

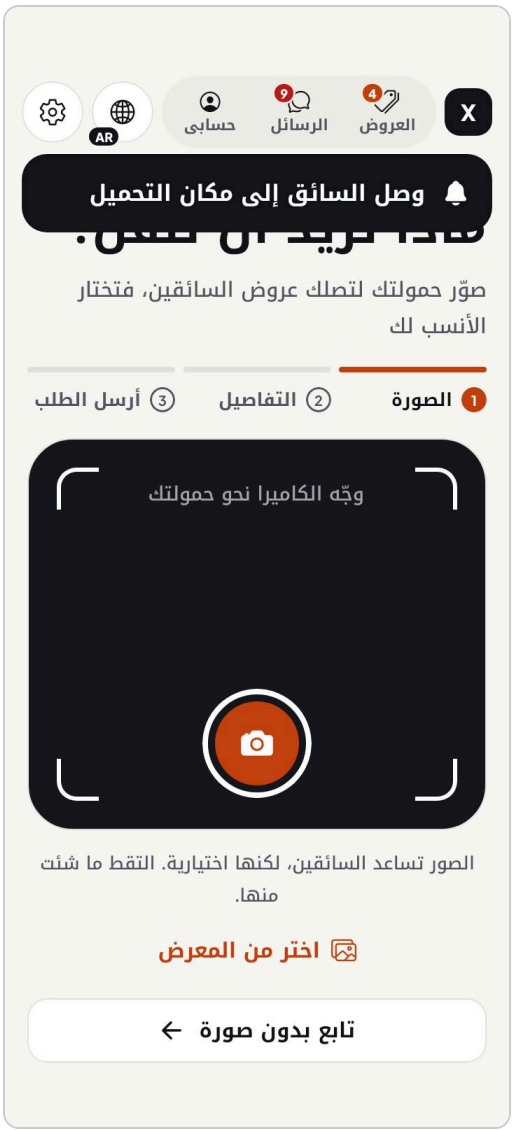

I want you that before sometime like you indicates okay that that the driver moves towards the towards them I pick up that's a notification is sent to the the customer and it's it's a that's where it follows his in the GPS of the driver inside there inside the map and it can be interactively showing in the map for the for the driver to see and for the customer to see okay so that it had it goes like there is this like a timer and it gets it is notification for the customer and the driver and so on and so on and so on you know it must be interactive

#20

#30

12/11/2026, 22:34:03 · customer · en · light · customer · saw

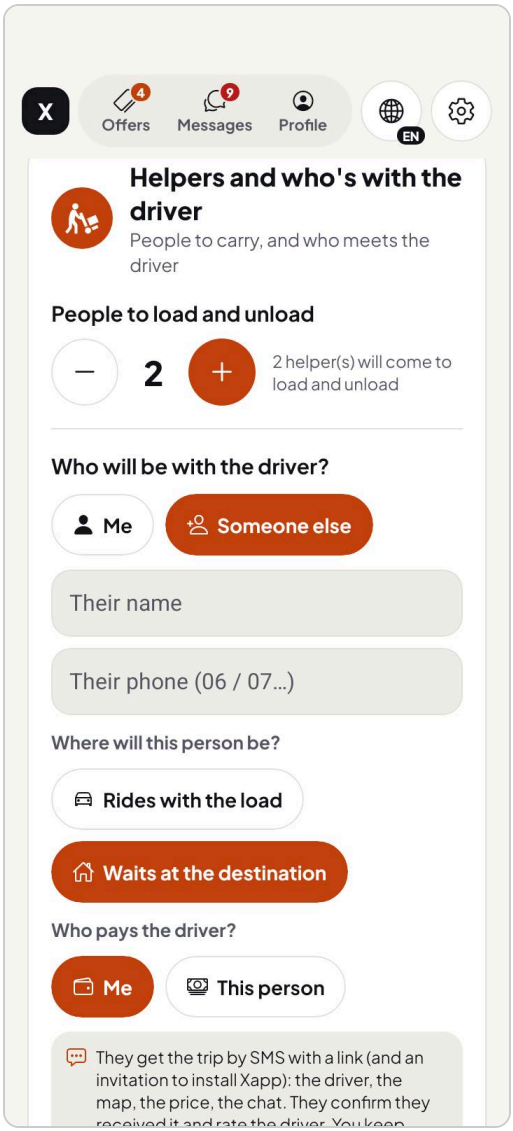

I want us I want us to build this engine this accurate near perfect engine or mechanism that can detect the right vehicle for the person based on the choices he made an options for instance if someone wants to move something from a city to another city we shouldn't give him that option to pick the three parts or you know three portal that's more vehicle in this vehicle choices as a pickup as a pick as a choice because he will be moving for messages another city we shouldn't give him that option it should be there but he should be like a great and and pickleball because he's picking a big load you know so there must be a mechanism an engine okay

#31

12/11/2026, 22:36:05 · customer · en · light · customer · card

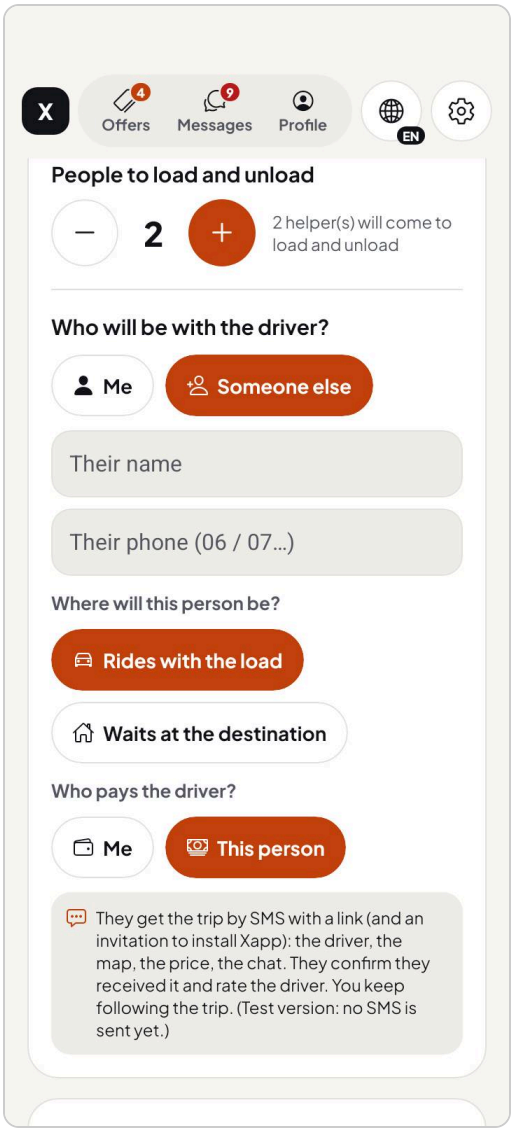

in here and who will be with the driver you know that feeling box their name it first showed at the right side it shouldn't be it should be showing at the left side because I'm using English for so for a French and English it should be showing in the

#32

12/11/2026, 22:37:12 · customer · en · light · customer · card

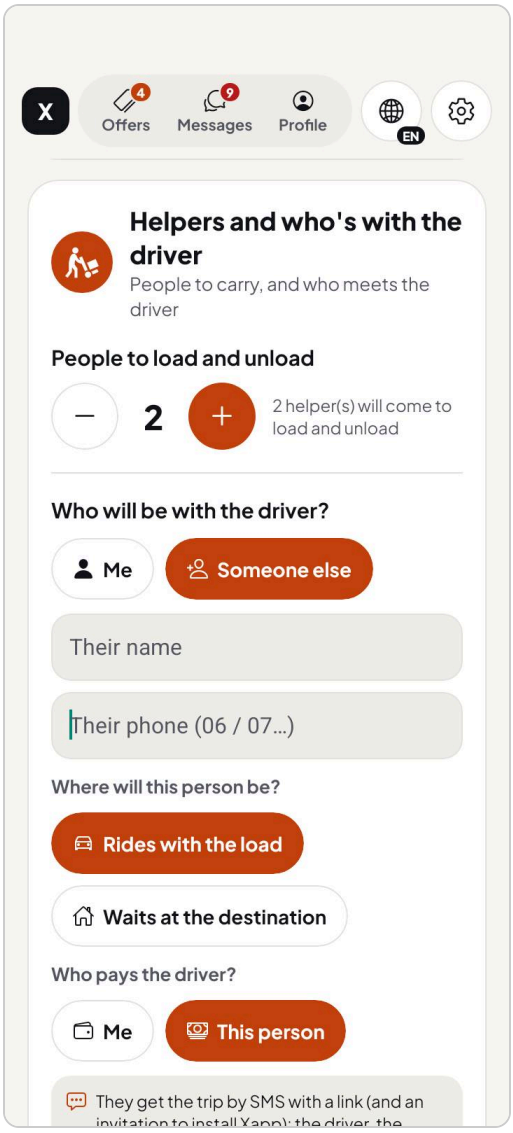

naked that the name of the person who will be with the driver or who will be at the destination make it that it is optional to give their name and phone number is not mandatory okay if anything it's given it's not showing to the to the toilet is not showing to the driver only to the booker okay

#33

12/11/2026, 22:38:17 · customer · en · light · customer · card

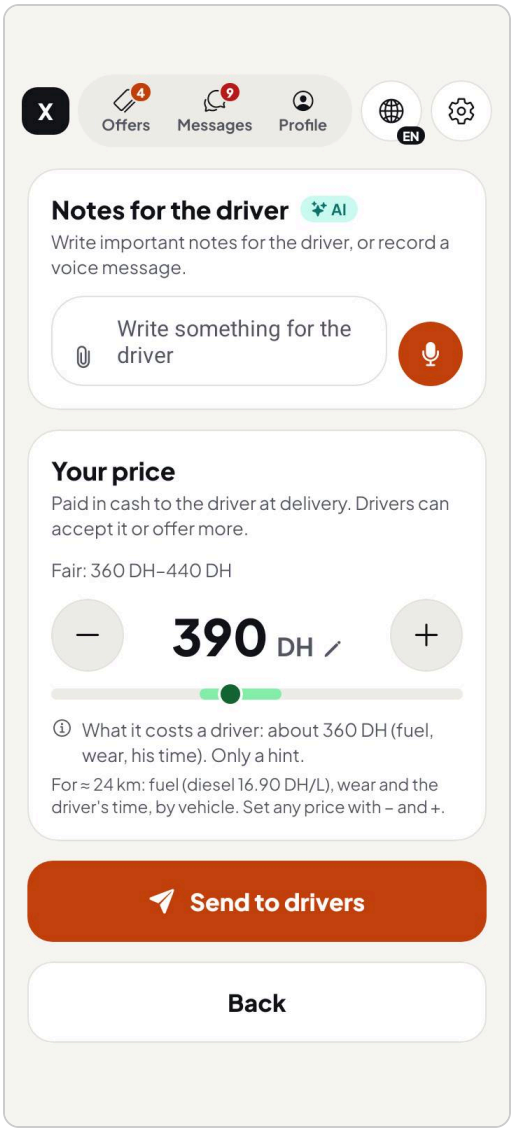

please change that name of who will be with the driver change it to it will there will there someone be with the driver okay so because sometimes no one will go with the driver okay so if he picks me or someone else then he gets asked another question who will be who will this person be rides with the load or did this person be I mean what rides with the load as you mention or wait at the destination and so on and so on with the questions

#34

12/11/2026, 22:40:05 · customer · en · light · customer · card

for the price that you put make sure that there is an accurate engine live engine almost perfect that can detect the price that He suggests normally based on real data active data and active mechanism that calculates everything which is normally for when best for the driver and for the customer so that's customer doesn't feel that application is too expensive and the driver doesn't feel that they expected expectation is to like cheap and at the same time it collects data from what's going on from what happens from the trips and so on so that he can really accuracy and at the same time like I've told you make it that's just this is just hint so people can choose

#35

12/11/2026, 22:41:45 · customer · en · light · customer · trip:open

and this once I collect the client and it gives me the option to give a counter offer to the driver at the end of it it gives me the expenses that the driver pay please make it less make it more simple don't say go give the tires does it make it like just one line explaining things and brief and in general

#36

12/11/2026, 22:43:02 · customer · en · light · customer · trip:accepted

and here wants to know for his book that tells me that that the guy will be getting into the driver will get notifications and you will get notifications but the thing is that once I have the the thing the same day the trip the same day it's it's mentions the word day it says you will get notification dead day while it's it happened in the same day so that's a message notification should be checked please check it you shouldn't be singing day make sure that you use proper language or the languages like right boarding in the grammar and across all languages

#37

12/11/2026, 22:44:57 · customer · en · light · customer · trip:accepted › tab:messages › chat

regarding the message that the person gets automatically in his chat box from the driver after he confirms the offer please make sure that he is doing right morning the right Grabber across our languages okay so you shouldn't use the word day if he have the same day trip isn't say that I will confirmed the day that I will come okay so make sure that you always right language across all languages in the application check it all and make sure you use the best language across everything used every word every sentence across the whole language okay detection engine for this in the correct everything

#38

12/11/2026, 22:46:31 · customer · en · light · customer · trip:accepted

the trip timeline that you add as a button can you please explain it to me is it something that's what happened in terms of notification inside the app once it go live and you just added this as a test phase or is it something that you added to explain something because the world in that you are using the grammar and the war sentences I don't know if you're talking about something that will happen in the future explain it to me or something that is happening right now

#39

12/11/2026, 22:48:14 · customer · en · light · customer · trip:accepted

and quick answer to questions that you add that section that you add you said that the driver must pay in cash to the other customer must be in cash the driver and you said nothing more please remove that nothing more that's that's two words nothing more remove it just those two words

#40

12/11/2026, 22:48:54 · customer · en · light · customer · trip:accepted

and the question what happens in the delivery that you added to the app please remove that there is no code removed as a sentence there is no code remove it just that sentence there is no

#41

12/11/2026, 22:50:10 · customer · en · light · customer · trip:accepted

and the help section that you added the problem is that it is some some of it goes down the screen of my phone I can't see them I can't find them so make sure that they fit the screens that everything is showing okay

#42

12/11/2026, 22:51:16 · customer · en · light · customer · trip:accepted

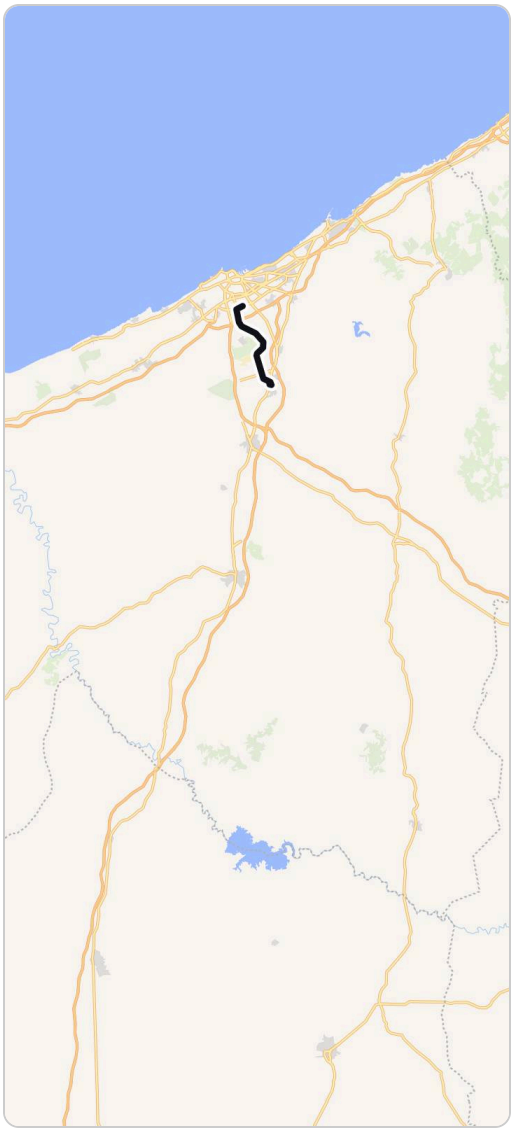

and to help section you gave an option to call and or to call on WhatsApp you didn't give an option to text Some people prefer texting so give an option to text okay inside the app or call inside the app why did you put the call and WhatsApp for just call inside the app or text inside that or call directly to the number okay directive phone number of the okay

#43

12/11/2026, 22:54:08 · customer · en · light · customer · trip:delivered

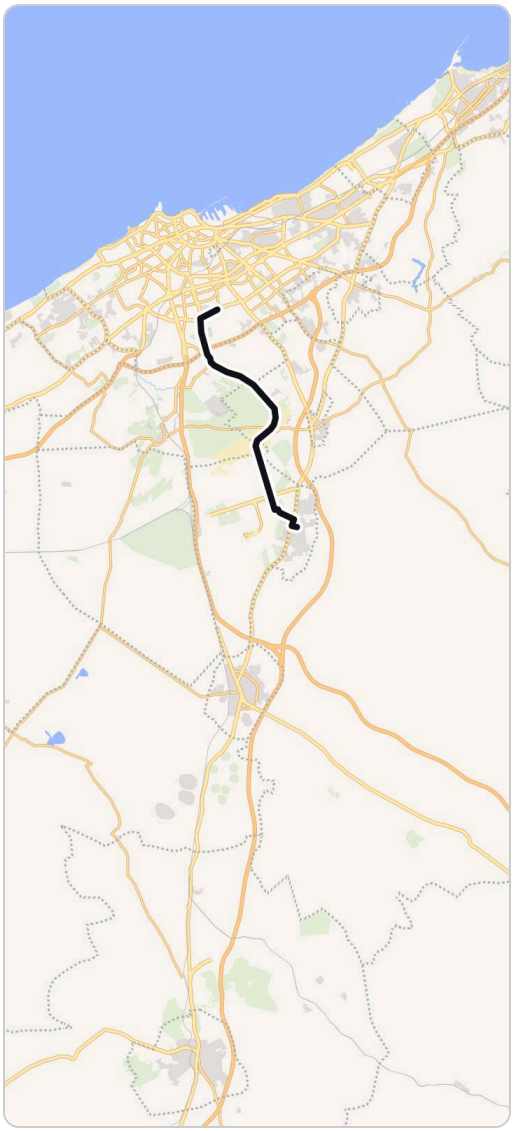

and what's the problem section that's a show up if the customer said that he received but with a problem it gives them an option to write it in a text box please add as well an option to like record the voice note same as the other ones he wants to leave a note to the driver once you make the offer same box same voice record is take a photo maybe you can take a photo with damage it goes or something that's happened that's great

#44

12/11/2026, 22:56:08 · customer · en · light · customer · trip:delivered

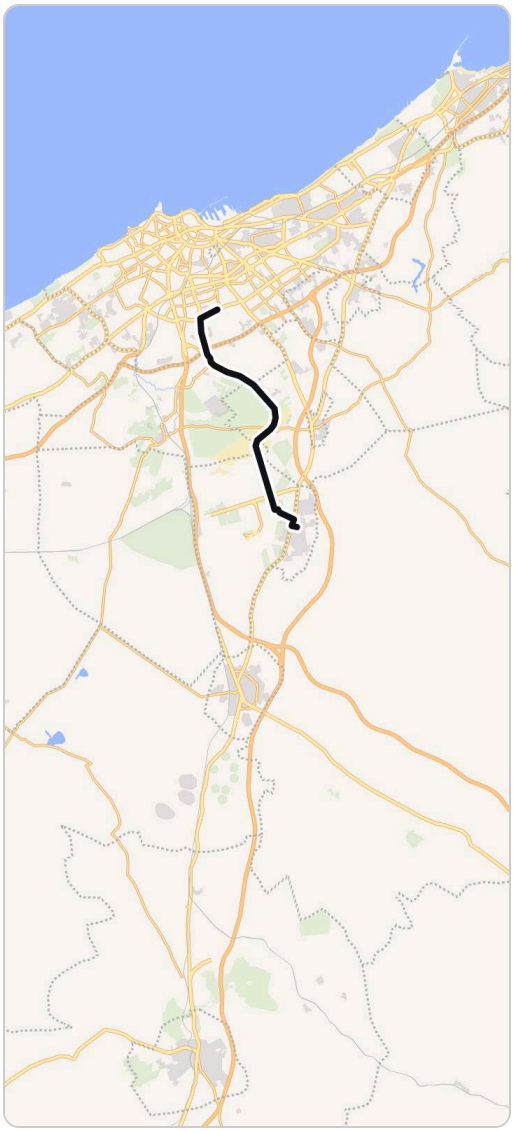

the end result should not be the same based on the event that happened if something is someone said that received then he can get that move something goes like message text if he wants to if he wants to but if he says that he received this but with a problem then he shouldn't just be given something that is everything is happening quite happy he's a given an insurance like it misses didn't him that we will look at it thank you for using our service but we will look at your problem we will get back to you or something like this to make sure that you care about him which is right we care about him that's what you care about him so the difference experience or saying sorry for driving that experience and then tell them that will look at it and get back to you something like this might okay we always make the customer on the driver feel like at home

#45

12/11/2026, 22:56:56 · customer · en · light · customer · trip:delivered

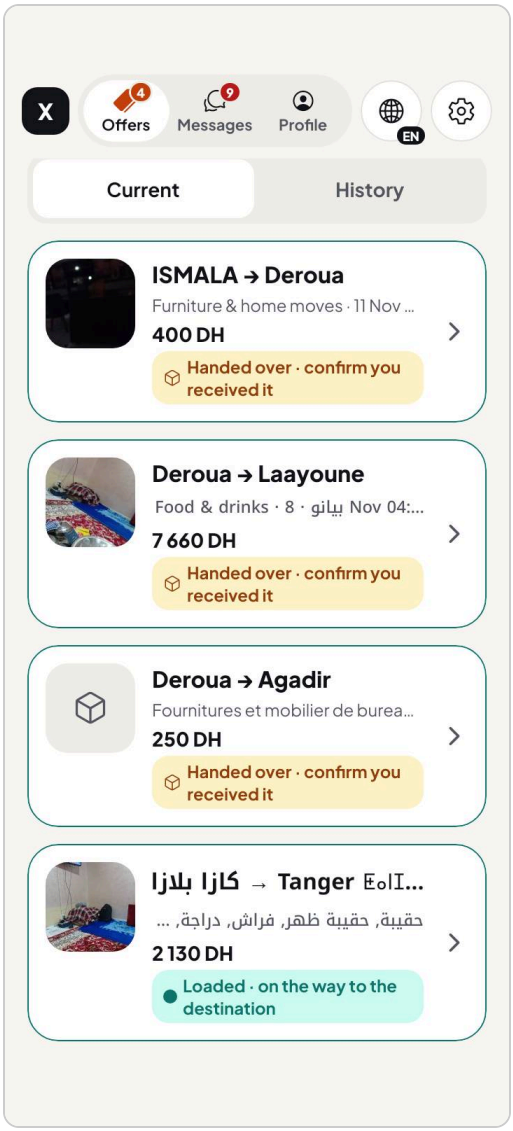

also in the rating system please add some things like the customer found on the driver and he can write like a right there can they pick from some options like it's very nice he came in time or so on and so on pick like some some five things or so and put them so that he can pick from when he's reaching him if he wants to

#46

12/11/2026, 22:58:27 · customer · en · light · customer · show › tab:offers

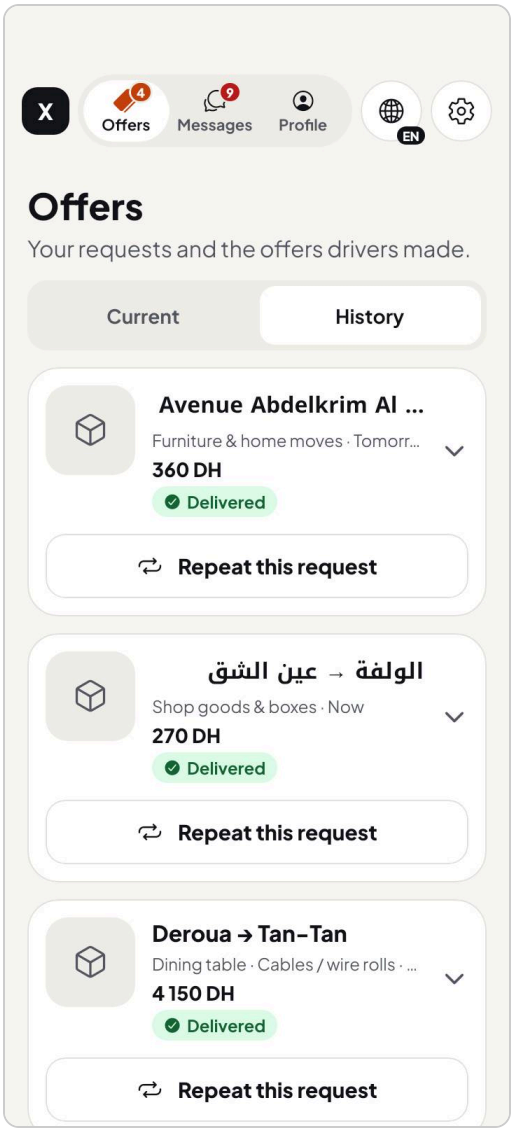

and the offers section make sure that things are correctly near perfect okay no mistakes if an offer is upcoming the same day it says so it's like there is a an upcoming offer if it offer or like I received and handled it says that it's in the past it says that that is received if it's ongoing it says that is active and I'm going something like that you pick the right world for three languages okay and if there is another like event it says that you you choosing you pick okay this

#47

12/11/2026, 22:59:21 · customer · en · light · customer · show › tab:offers

but make sure that they are make sure that the offers are split between history like things that are delivered the things that are canceled or so are mentioned in that history and the things that are current you mentioned that the current load that which needs confirmation the current that are low moving right now the current that's all right and the future like today or tomorrow or so that's not been loaded yet okay make sure that they use the distinction and use proper language correct language

#48

12/11/2026, 23:01:18 · customer · en · light · customer · show › tab:messages

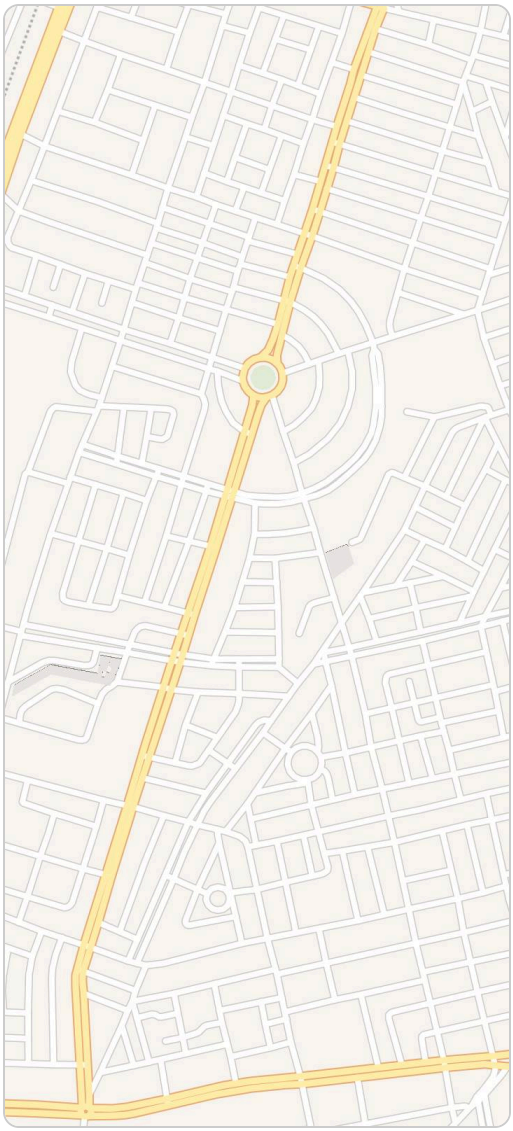

and the messages section should we make an open for the customer or the driver to connect to each other from after their bike trips or should we limit that or remove them because we have talked to you and I about making that favorite you know driver for the customer if he wants to go through but we also talked about the fact that they can go beyond the application and talking the chat or change exchange your numbers in the chat or make like office in the church which will the the application will not make any money from so please make an engine for this in the rules for this week make it proper okay

#49

12/11/2026, 23:03:31 · driver · en · light · driver · loads

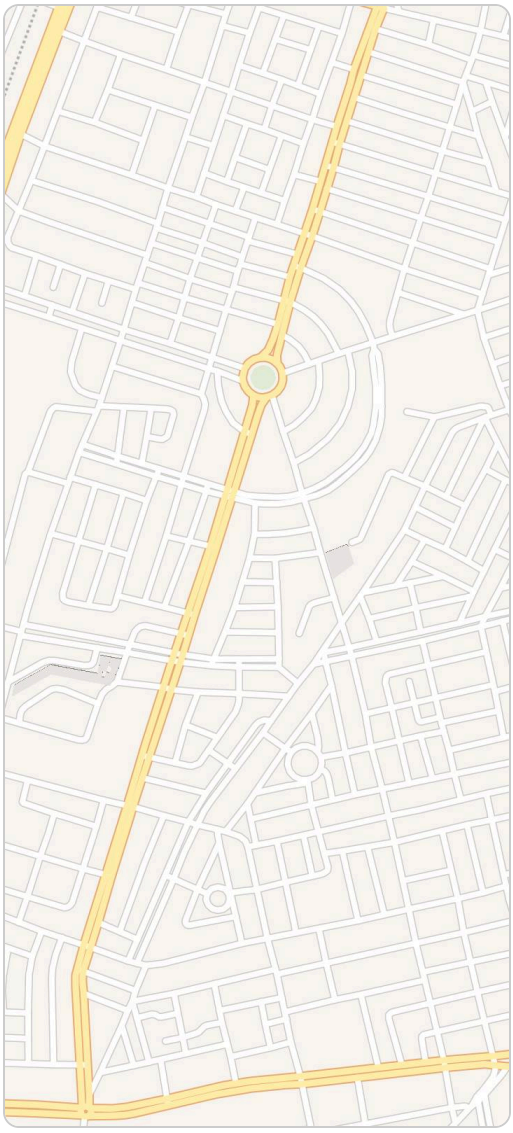

in here in the driver's main page you can see that the the color is used are mostly white and so so because of a person cannot differentiate the user cannot differentiate because the lack of colors please make it colorful and make the the main options or buttons are clear so that he can pick okay as it make things clear like announcing a trip the arrange the current trips or so on and offers make things clear make use a better coloring and atr can be beautiful

#50

12/11/2026, 23:06:50 · driver · en · light · driver · loads

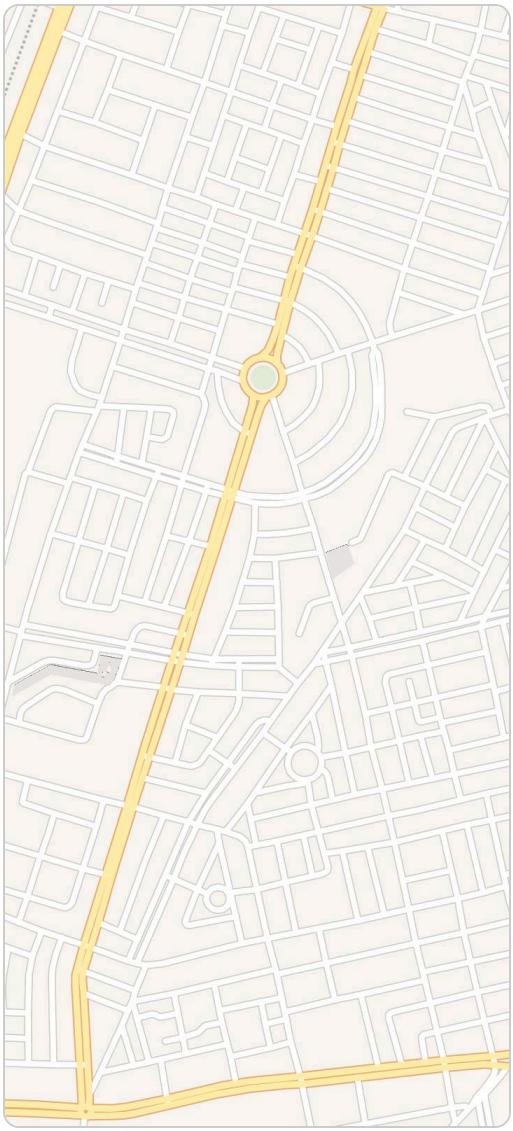

and I now strip and they announced trip make it that's when he announced a trip from where to where that's he like to make sure that in the Jeep a the map behind him the main map and the driver's main page he is current location is shown like in the GPS despite what he chooses in there from where to where because Justin announcement for tomorrow for an or another day and also make sure that he went to the trip that he gets to be showing whether is it today or if it's tomorrow or another day if it's another day he gets to pick like the same time animated time and the hour we use in the customer for taking the time same thing and he gets to be true he's coming back if he said he is coming back he was given option as well was it today or I mean to the same day not today is it the same day or another day and if this is another day he gets to pick okay it's just optional this is all just optional and maybe with the option we don't say optional we all know just optional but I just want you to make it that sure that there is an edit so that he can edit his announcement whenever he wants okay

#51

12/11/2026, 23:08:35 · driver · en · light · driver · loads › tab:profile

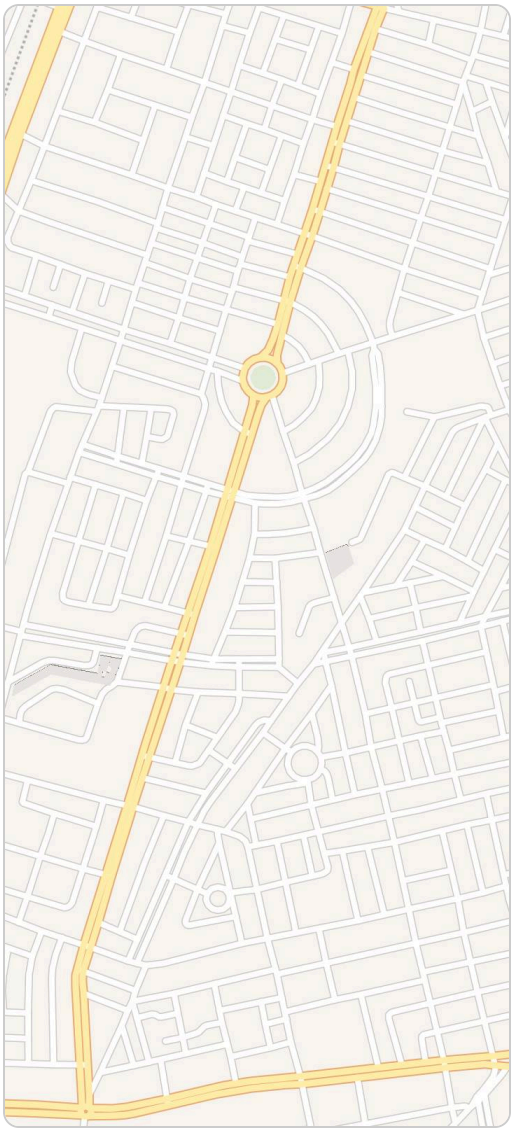

for the drivers for the driver's profile make sure that he gets to ask all the things that he is in profile that once he logged then sign up for the first time which can edit afterwards if he wants to like the information and uploading the the documents and so on

#52

12/11/2026, 23:09:26 · driver · en · light · driver · loads › tab:profile

and for the photo make sure that the photo is mandatory okay when giving him an example of the right photos once he takes them so that's it can be shown okay like once he wants to upload them the beginning and which is

#53

12/11/2026, 23:12:40 · customer · ar · light · customer · card

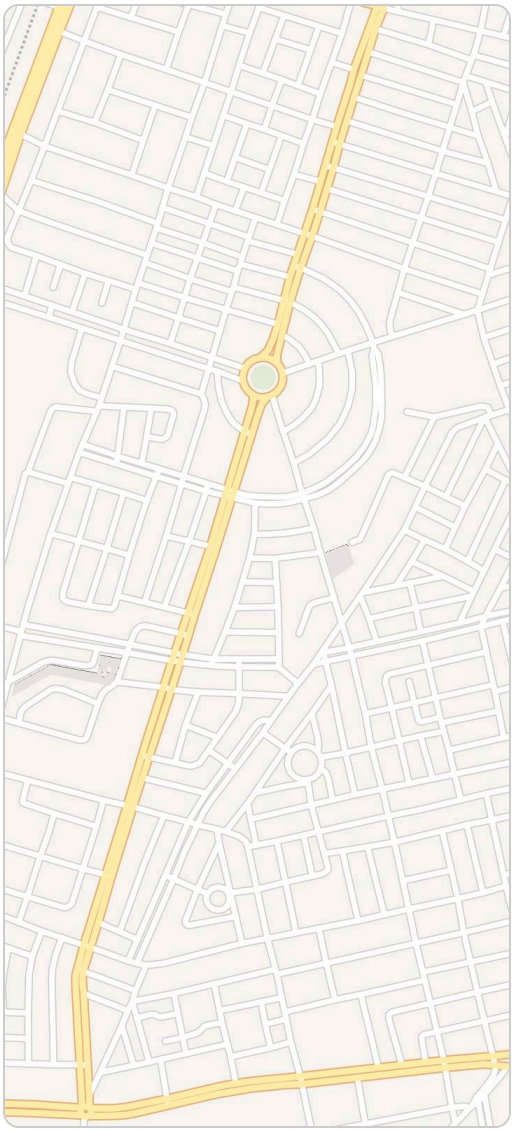

and the who will be with the driver make sure that's me or someone else and who are when he where will he be with ride along or waiting at the destination make sure that these four are not by default chosen make sure that they are not choosing he picks what he wants

#54

12/11/2026, 23:14:24 · driver · ar · light · driver · loads

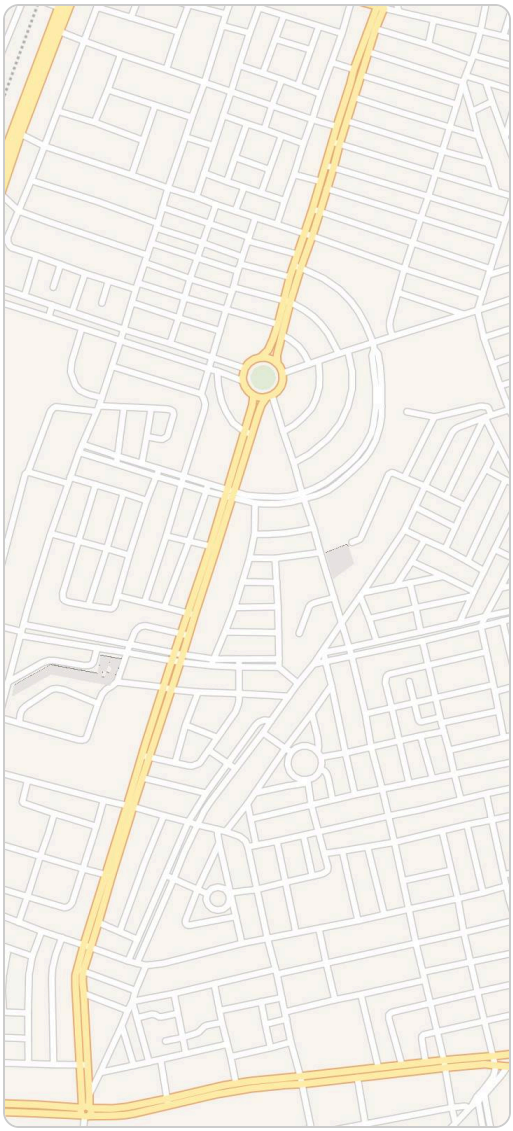

in the drivers mean the page once he gets an offer some offers I don't like the way that everything is handled in the main page of the driver change it and change the design make it more proper and simple and attractive and simple and smooth because you can see that the announcement from if he wants to announce the trip underneath it there are the offers things that makes becomes so chaotic for the user to like really interact with so please change the design and make it simple and beautiful and

#55

12/11/2026, 23:15:16 · driver · ar · light · driver · loads

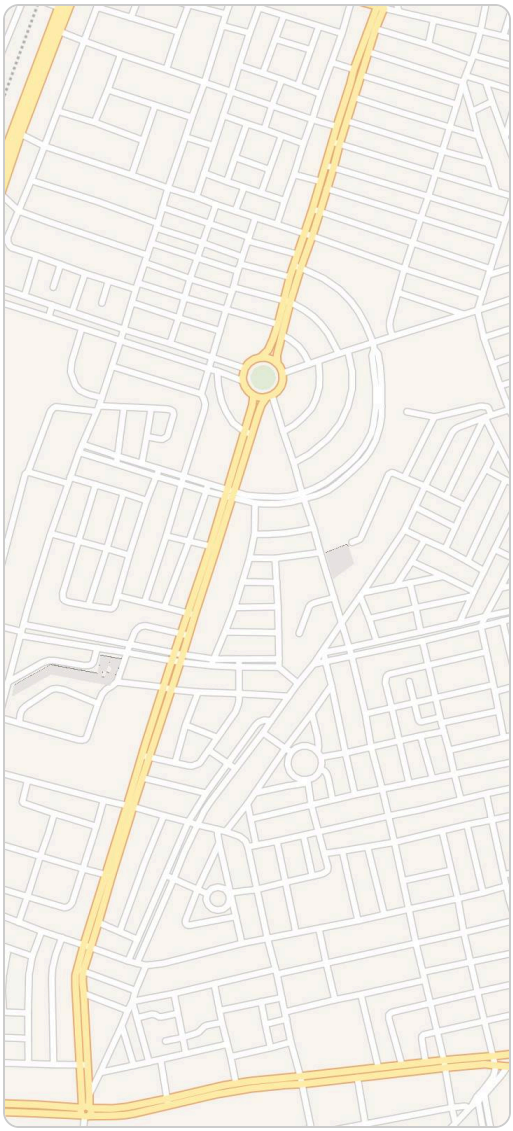

I understand this and that's a section in which the driver can see the offer the price underneath it do you offer somebody you give some money and you said plus remove that just to make sure just the button in which the driver can edit the price and then he can write the same price either he can add to it by clicking plus or minus or he can just click the edits and he can then write his own price okay

#56

12/11/2026, 23:16:24 · driver · ar · light · driver · earn

please that's your earnings earnings section that you put in the main page please change its place and add it as a tab as a section at the top between messages and the profile okay between messages and profile and it's on there in which you can click there and see his earnings okay remove it from place and move it to the top
